

Functional Requirements and User Stories

Functional Requirements

FR-001 Customer Intake

The system shall allow a customer or agent to start an onboarding request and capture identity, address, and contact details.

FR-002 Mandatory Field Validation

The system shall validate mandatory fields before sending a request for identity verification.

FR-003 Identity Verification

The system shall call the identity verification service and store the response.

FR-004 Manual Review Routing

The system shall route cases to manual review when identity confidence is below threshold or when verification fails with ambiguous status.

FR-005 Case Search

The system shall allow operations staff to search cases by request ID, customer ID, status, or date range.

FR-006 Audit Logging

The system shall record workflow events including submission, verification result, approval, retry, account creation, and notification.

FR-007 Retry Handling

The system shall support retry when verification service times out.

FR-008 Account Creation

The system shall create an account only after identity verification passes and mandatory fields are complete.

FR-009 Notification

The system shall notify the user when onboarding completes or fails.

FR-010 Status Tracking

The system shall show current onboarding status to operations users.

User Stories

US-001

As a customer, I want to submit onboarding details so that I can open an account.

US-002

As an operations analyst, I want to search onboarding cases by status so that I can manage pending work.

US-003

As a compliance officer, I want every onboarding case to show verification outcome and audit trail so that I can review decisions.

US-004

As a support agent, I want to view failure reasons so that I can assist customers.

US-005

As a system administrator, I want retryable timeout failures to be clearly distinguishable from hard failures.

Open Questions

- What is the exact confidence threshold for manual review?
- Which notification channels are mandatory: email, SMS, or portal only?
- How many retry attempts are allowed before case escalation?
- Is passport an accepted document type for all customer segments?
