

Defect Severity and Priority Matrix

Severity

- Sev1: Critical business outage, data corruption, or compliance breach
- Sev2: Major functional failure with no acceptable workaround
- Sev3: Moderate issue with workaround available
- Sev4: Cosmetic or low-impact issue

Priority

- P1: Immediate fix required for MVP demo or release gate
- P2: Important fix required soon
- P3: Can be fixed in normal backlog order
- P4: Nice to have / defer

Examples

- Account created without successful verification -> Sev1 / P1
- Case search fails for valid request ID -> Sev2 / P1
- Retry status label is misleading -> Sev3 / P2
- Minor alignment issue in status screen -> Sev4 / P4
