

# Change Request: Contractor Onboarding

---

## Summary

The onboarding platform must now support contractor onboarding in addition to retail and small business customers.

## Requested Changes

- Allow passport as an alternate identity document for contractors.
- Add contractor\_type field.
- Route contractor onboarding to Compliance Review queue after verification.
- Support contractor account expiration date.
- Notify internal sponsor when contractor onboarding completes.

## Impact Considerations

- Existing data dictionary does not include contractor\_type or expiration\_date.
- Existing API spec does not show sponsor notification fields.
- New acceptance criteria and test scenarios will be needed.
- Additional role-based visibility may be required for sponsor notifications.
